

Cyber Incident Complexity Analysis Framework	Yes	No
Incident Name:		
Date:		

There are few hidden lines to assist in counting the choices, but this will result in counting if there is anything entered into the cells including spaces. If there total shows but nothing has been selected, highlight the cells and right click. Then chose clear contents.

Community Lifelines: Safety and Security; Food, Hydration, Shelter; Health and Medical; Energy; Communications; Transportation; Hazardous Materials; Water Systems		
Are Community Lifelines significantly impacted?		
Life safety:		
Poses an imminent threat to the lives of U.S. Persons?		
Financial:		
Able to pay employees/contractors?		
Are there significant replacement costs for equipment?		
Should be less than \$100,000		
Should be less than \$1,000,000		
Should be less than \$10,000,000		
May be more than \$10,000,000		
Information Impacted:		
Is the information regulated? (Personal Health Information, Payment Card Information, Identifying information)		
Is there a potential to require mandatory reporting?		
Is the information related to National Security?		
Situational Awareness:		
Is this event related to a bigger event?		
Could there be national media attention?		
Media/Social Impact:		
Local media is or will be interested?		
National media is or will be interested?		
JIC will be established		
Regular public updates will be needed?		
Critical Infrastructure		
Is there a potential for downstream impacts to critical infrastructure (not to include community lifelines)?		
Political/Economic Sensitivity:		
Cost of incident mitigation will be significant?		
High potential for incident growth and or escalation of the event?		
Local municipality, City, or County declaration has been made or will be needed?		
Governor's Emergency or Disaster Declaration has been made or will be needed?		
Stafford Act Disaster Declaration has been or will be needed?		
Other:		
Forensics expertise is or will be needed?		
There is or will be a need for private/contracted resources?		
Resources/personal from outside the impacted entity are needed?		
Resources/personal from mutual aid agencies are needed?		
There are state resources at the incident or will be needed?		
There are federal resources at the incident or will be needed?		
Is there an additional current incident/event that this cyber incident could impact?		
The EOC(s) has been or will need to be activated?		
Other Issues:		
Total:		

Types of Cyber Incidents

Type 5

- Loss of life directly attributable to the cyber incident.
 - Community Lifelines non-functional
(Safety and Security; Food, Water, Shelter; Health and Medical; Energy; Communications; Transportation; Hazardous Materials)
 - Essential services non-functional
(Dispatch Centers, Fire/EMS services, etc.)
- Financial impacts exceed the organizational capabilities.
(Ransom/Replacement costs exceeds the organizations budget)
- Confirmed exposure records of Personal Information
- Services critical for payment and financial processing non-functional

Type 4

- Community Lifelines impacted and minimally operational
(Safety and Security; Food, Water, Shelter; Health and Medical; Energy; Communications; Transportation; Hazardous Materials)
- Essential services impacted and minimally operational
(Dispatch Centers, Fire/EMS services, etc.)
- Financial impacts are close to meeting the organizational capabilities.
(Ransom/Replacement costs exceeds the organizations budget)
- Suspected records of Personal Information exposed
- Services critical for payment and financial processing impacted and are minimally operational

Type 3

- Community Lifelines impacted and partial operational
(Safety and Security; Food, Water, Shelter; Health and Medical; Energy; Communications; Transportation; Hazardous Materials)
- Essential services impacted and partially operational
(Dispatch Centers, Fire/EMS services, etc.)
- Financial impacts are close to meeting the organizational capabilities.
(Ransom/Replacement costs exceeds the organizations budget)
- Potential Personal Information exposed
- Services critical for payment and financial processing impacted and partially operational

The United States cybersecurity cyber incident common framework agencies have

- The...
- The...
- The...
- The...

The table below

Type 2

- Community Lifelines impacted and mostly operational
(Safety and Security; Food, Water, Shelter; Health and Medical;
Energy; Communications; Transportation; Hazardous Materials)
- Essential services impacted and mostly operational
(Dispatch Centers, Fire/EMS services, etc.)
- Financial impacts are close to meeting the organizational capabilities.
(Ransom/Replacement costs exceeds the organizations budget)
 - Potential Personal Information exposed
- Services critical for payment and financial processing impacted and
mostly operational

Type 1

- Community Lifelines are not impacted and are completely operational
(Safety and Security; Food, Water, Shelter; Health and Medical;
Energy; Communications; Transportation; Hazardous Materials)
- Essential services are not impacted and are completely operational
(Dispatch Centers, Fire/EMS services, etc.)
 - Financial impacts are minimum.
- (Ransom/Replacement costs exceeds the organizations budget)
- Little to no belief of exposure records of Personal Information exposed
- Services critical for payment and financial processing are not impacted
and are completely operational

Cybersecurity Incident

A cybersecurity incident (or simply incident) is ...an occurrence that actually or imminently jeopardizes, without lawful authority, the integrity, confidentiality, or availability of information or an information system; or constitutes a violation or imminent threat of violation of law, security policies, security procedures, or acceptable use policies. [FISMA2014]

Cyber Incident Severity Schema

tates Federal Cybersecurity Centers, in coordination with departments and agencies with a y or cyber operations mission, adopted a common schema for describing the severity of its affecting the homeland, U.S. capabilities, or U.S. interests. The schema establishes a network for evaluating and assessing cyber incidents to ensure that all departments and e a common view of the:

severity of a given incident;
urgency required for responding to a given incident;
seniority level necessary for coordinating response efforts; and
level of investment required of response efforts.

low depicts several key elements of the schema.

	General Definition	Observed Actions	Intended Consequence ¹
Level 5 <i>Emergency</i> (Black)	<i>Poses an imminent threat to the provision of wide-scale critical infrastructure services, national gov't stability, or to the lives of U.S. persons.</i>	Effect	Cause physical consequence
Level 4 <i>Severe</i> (Red)	<i>Likely to result in a significant impact to public health or safety, national security, economic security, foreign relations, or civil liberties.</i>	Presence	Damage computer and networking hardware
Level 3 <i>High</i> (Orange)	<i>Likely to result in a demonstrable impact to public health or safety, national security, economic security, foreign relations, civil liberties, or public confidence.</i>	Engagement	Corrupt or destroy data Deny availability to a key system or service
Level 2 <i>Medium</i> (Yellow)	<i>May impact public health or safety, national security, economic security, foreign relations, civil liberties, or public confidence.</i>		Steal sensitive information
Level 1 <i>Low</i> (Green)	<i>Unlikely to impact public health or safety, national security, economic security, foreign relations, civil liberties, or public confidence.</i>		Commit a financial crime
Level 0 <i>Baseline</i> (White)	Unsubstantiated or inconsequential event.	Preparation	Nuisance DoS or defacement
